

ZIRCONITE

PROTECTION SYSTEM

DATA SHEET

FABRIC, CARPET & CABRIOLET HOOD PROTECTOR

Total Protection:

Zirconite Fabric Protector provides an invisible protective barrier to everyday spills, stains and soiling on automotive fabrics and carpets e.g. Juices, Cola, Tea, Coffee etc.

Ideal For Heavy Use Areas:

Zirconite Fabric Protector is ideal for protecting vehicle interior areas: driver seats, carpets, boot areas. Not only will it protect from spills etc, but allows for easier clean-up and extends fabric lifetime.

Cabriolet Hood sealant: provides re-waterproofing sealant to hoods, and helps protect original surface from tree sap problems and bird lime staining.

Household applications: Zirconite liquid Protector has a multitude of applications and uses for protection of fabric seating & carpets in the home, as well as outdoor applications e.g. re-waterproofing of coats & outdoor equipment.

Non Hazardous Ready-to-Use Formula:

Water based non-aerosol formulation makes application and handling easier and safer.

APPLICATION NOTE: N.B. When spraying in confined spaces e.g. vehicle interiors ensure vehicle doors & windows are fully open to allow free flow air ventilation. **Do not inhale the spray mist. If excessive airborne spray mist is likely a standard particulate face mask must be worn. Use only low pressure spray equipment (spray pressure should not exceed 4 bar).**

Directions:

Ensure surface to be treated is clean and dry before application. To check colour fastness, try on an inconspicuous area first.

Apply using a pressure sprayer, set fan to approximately 45° and ensure that product is spraying evenly before application (not too thick or thin).

Spray **2 light applications** in a crosswise manner, first horizontally and the vertically to ensure even coverage. Do not saturate fabric.

Allow to dry completely before putting back into service. For maximum protection allows to fully cure for 4 hours.

Introduction of warm air will accelerate drying process, and shorten curing time.

Coverage 100ml /sq.metre. So 1L covers 10 sq.m.

Typical Specification :

Composition : Flouroacrylate copolymer in an aqueous organic emulsion.
 Appearance : Water white liquid
 Odour : Odourless
 Solubility : Insoluble in water
 Shelf Life : 2 years in unopened containers.
 Packaging : 25L plastic drum.

CODE: ZIR495
