

# Zirconite

## STAGE 2 – NANO GLAZE

**Zirconite Nano Glaze:** Unique blend of PTFE and acrylic resins containing UV screens.

**Unrivalled Gloss & Protection:** Leaves a deep deep gloss shine and a protective barrier for today's modern paint finishes

**Tested to extremes:** Zirconite Nano Paint Protection system has undergone the most rigorous of development regimes, making it suitable for use in the harshest of climates and environments from Scandinavia to the Middle East.

**Low Chalk:** Minimises rubber or plastic staining – No dusting problems.

**Environment Friendly:** Unique water based formulation contains no aromatic solvents.

**Bodyshop Approved:** Contains no volatile silicones.

**Directions:** Shake well before use. Apply to pre-treated area, section by section, using a clean soft cloth in a conventional polishing manner. Do not over apply or use in direct sunlight.

Treat vehicle section by section, allowing paint surface to haze, then buff to a deep shine with a dry CAP4 micro-fibre polishing cloth. Alternatively use polishing machine with black foam mop.

**Polished surfaces should be kept dry for four hours to ensure that the initial curing phase is successful.**

### Typical Specification:

**Composition :** An emulsified blend of P.T.F.E, acrylic resin, waxes, non volatile silicones, polishing aids, non aromatic solvents in water.

**Appearance :** Opaque liquid

**PH :** 8.0

**Colour :** White

**Viscosity :** Thick liquid

**Perfume :** Warm fresh

**Stability :** Protect from freezing. Store at ambient temperature.

**Shelf Life :** Twelve months minimum in unopened containers.

**Packaging :** 125ml & 1L Plastic Containers
