

ZG-365

GRAPHENE INFUSED COATING

Ultimate In Beading: Graphene Infused High Gloss Multi-Surface Protective Coating cures to form a strong chemical bond to paintwork and other hard substrates.

Quick and Easy: Simply Mist on Buff-off.

Boost: ZG-365 can be layered within 3mins of original application to boost scratch and abrasion resistance.

Long lasting: Graphene Infused Coating delivers up to 365 days of protection to treated surfaces.

Incredible high-slip finish: Developed to deliver an exceptional high slip finish which helps to maintain and enhance the dramatic and magical 'Lotus-Leaf' water beading effect to repel water and dirt build up,

Rapid Protection: Protective coating for rapid sealing of most exterior surfaces including:
Paint
Plastic Trim
Wheels

Easy to use: for both the Professional and Detailing enthusiast.

Directions for Use:

Do not apply in direct sunlight.
Ensure surface is cool, clean and dry.
Shake well before use.

Spray sparingly directly onto surface or into a micro-fibre cloth.

Distribute the product to the surface area ensuring an even coating.

Once applied buff the surface **immediately** to deliver an exceptional high gloss finish using a second dry ZIRCONITE Micro-fibre Detailing Cloth.

Treat one panel at a time.
Keep out of rain for 30 minutes after application.

Typical Specification:

Colour : Grey
Viscosity : Liquid
Stability : Store at ambient temperature.
Shelf Life : Minimum 18 months in unopened containers.

Zirconite ZG-365 is a Trade Mark of Concept Chemicals & Coatings Ltd.
